

[Tapur Quick Manual]

Click the task tray icon on the bottom of your screen, then Click **[Open]** to show **Inbox**.

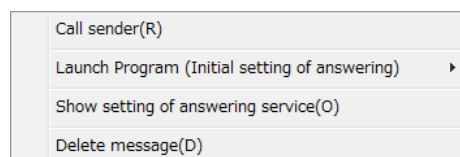

1. Inbox

You can play and listen to recorded messages, and save them in Inbox. When you want to play a message, select one of the listed messages and then click  button in the bottom section.

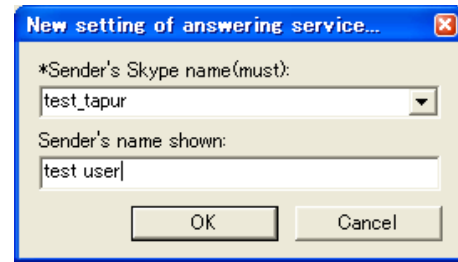

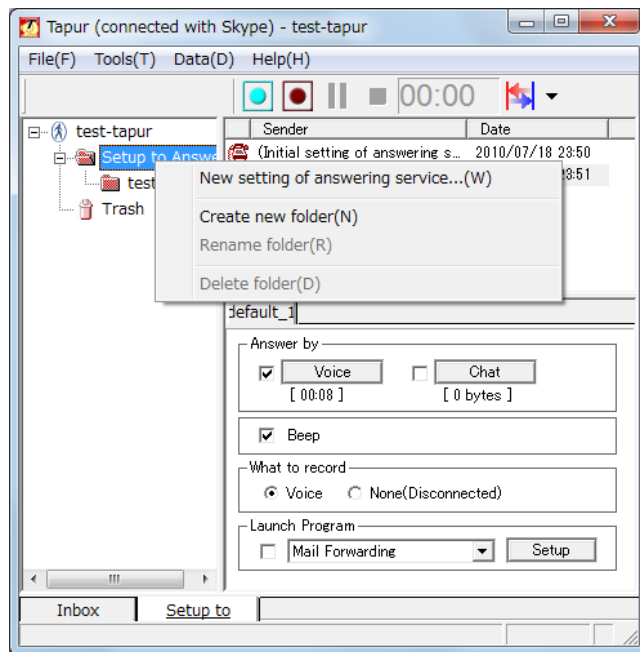

You can **[Call sender]**, **[Delete message]** and more by selecting a message and right-clicking it.

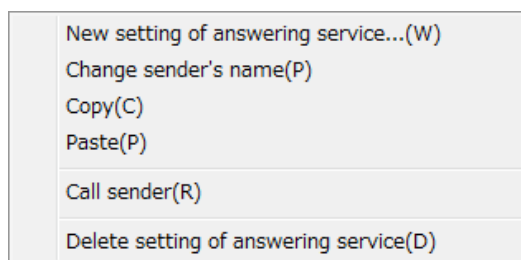

2. Setup for answering service

You can change the display for **[Inbox]** and **[Setting to Answer]** by selecting a tab of the lower left.

Tapur offers **[Initial setting of answering service]**, but you can set your own answering voice or sound according to senders. Right-click **[Setup to Answer]** and **[New setting of answering service]**.

In [New setting of answering service], there is the same voice as [Initial setting of answering service]. Choose "Voice", "Chat". And input a new audio file, a chat message. You can choose duplicate answers.

You can [Change sender's name], [Copy], [Paste] and more by selecting your own setting and right-clicking it.

3. How to record

The function of recoding voice or movie is available only on line. Click [Start recording voice] or [Start recording movie] on the toolbar or [Tools] on the menu bar.

*To record voice for 1 hour, about 200MB disk space (WAVE fromat) or about 20MB disk space (MP3 fromat) is required on the C: drive.

*Recording video function require more than some Gbytes disk space on the C: drive. You can reduce your video file size several times less than noncompressed ones.
