

[What's Tapur ?]

[Tapur] is answering service, recording voice & movie for Skype.

[System Requirements]

Before installing Tapur, your computer must meet the following requirements:

+Supported Operating Systems: Windows 2000 / XP / Vista / 2003 Server

+Skype (Ver3.0 or later required) needs to be installed beforehand.

[How to Install Tapur]

If you already have a previous version of Tapur installed, you had better uninstall it first.

Please install by administrator privilege.

- ① Download the file from the following site.
<http://www.tapur.com/>
- ② Save the file to your hard disc and double-click the **(EXE) program file**. Follow the instructions on the screen to complete the installation.
- ③ By clicking the **[Delete all user data] option** button, you can delete all of your data made by previous versions of Tapur. Please note that you can't recover any data deleted by this action.
- ④ After completing the installation, a dialog box will appear to connect with Skype.

Click **[Allows access]**. A small icon of Tapur will appear in Task Tray (usually in the right bottom of screen).

*Tapur communicate with Skype by tcp ports when recording. If the firewall is enable on your OS, you need open these ports in the firewall for Tapur.exe.

[How to Remove Tapur]

Before removing Tapur, make sure to end Tapur and Skype.

You have to remove Tapur by same user who installed Tapur.

On the **[Start Menu]**, point to Settings and then click **[Control Panel]**. Double-click

[Add/Remove Programs]. In the list of currently installed programs, select **Tapur** and then click **Remove**. Follow the instructions on the screen to complete to remove this program.
